Our Vision

“To shape our customers’ requirements by anticipating tomorrow’s needs today!”

To prepare RiVidium for the future, RiVidium has balanced all parts of its organization to attract the finest employees in order to *“Strive to be the missing element defining tomorrow’s technology for our clients.”*

With a leaner organization, less overhead, reformed Lines of Business (LoB) and Operational Structures, RiVidium keeps pace and surpasses its competitors. In turn, RiVidium meets the challenges of advancements in Logistic Services, Financial Services, Human Capital Services, Training Services, Marketing Services, Information Technology Services, Engineering Services, Cyber Security Services and Intelligence Services.

As a corporate structure, RiVidium has two distinct units: The Operational Unit and the Line Unit. The **Operational Unit** supports the day-to-day operations of RiVidium as a Business. The **Line Unit** support the day-to-day operations of RiVidium clients and product delivery. The Line Unit consists of ten (10) Practice Areas and four (4) Divisions. The Practice Areas and labor categories found within this document are endemic to the Line Unit and the Divisions within it. The Practice Areas are aligned to each Division as follows:

Commercial Price List - Practice Area	Logistics & Finance Division	HR & Training Division	IT & Engineering Division	Cyber & Intelligence Division
(L0000) – Logistic Services	✓			
(F0000) – Financial Services	✓			
(A0000) – Administrative Services	✓			
(H0000) - Human Capital Services		✓		
(T0000) – Training Services		✓		
(M0000) – Marketing Services		✓		
(I0000) – Information Technology Services			✓	
(E0000) – Engineering Services			✓	
(C0000) – Cyber Security Services				✓
(N0000) – Intelligence Services				✓

**** This Commercial Price List covers the Intelligence Services Practice Area and can be downloaded from our website at: <https://www.rividium.com/pricelists/intelpricelist.pdf>**

	N0007	Principal Consultant I	<p>Specialized Experience: The candidate will have both technical and management experience, from inception to deployment, of two or more large-scale complex Projects in one or more of the following areas: Information Engineering - including demonstrated experience as the senior technical member of a team responsible for the implementation of information engineering projects. Experience in systems analysis, design and programming using CASE and IE tools and methods, (such as Oracle CASE, IEF CASE and I- CASE). Demonstrated experience in the client/server environment.</p> <p>System Architecture and Administration - Must be able to demonstrate use of structured analysis, design methodologies and design tools (such as IDEF 1x, entity relationship diagrams, and other design techniques), object-oriented principles, and experience with the logical and physical functional, operational, and technical architecture of large and complex information systems. Must have demonstrated experience using current DBMS's technologies, application design utilizing various DBMS and experience with DBMS internals.</p> <p>Business Process Reengineering - including facilitation, training, methodology development and evaluation, process reengineering across all phases, identifying best practices, change management, activity and data modeling, or information system development methods and practices; or Communications - including protocol analysis, knowledge of OSI protocol (such as TCP/IP, X.25.X.400 and X.500). Experience with current applicable technology, (such as ATM, frame relay, bridges, routers, gateways, FDDI, network operating systems). MCSE certification, CNE or ECNE experience a plus. Operation and maintenance of communication network systems that may be mainframe, mini, or client/server based. Work with senior staff to define computer security requirements for high level applications, evaluation of approved security product capabilities, and developing solutions to MLS problems.</p> <p>General experience includes demonstrated exceptional written and oral communications skills, including White Papers and formal presentations. Must have demonstrated experience in execution of key project areas. Demonstrated ability to work independently or under only general direction.</p> <p>Responsibilities: Serves as a Technical Project Lead or Manager across all major technical areas of the project, applying a wide spectrum of disciplines for the planning, analysis, design, implementation and support of assigned tasks. Develops analytical and computational techniques and methodology for problem solutions. Performs enterprise wide strategic systems planning, business information planning, business and analysis. Performs process and data modeling in support of the planning and analysis efforts using both manual and automated tools; such as Integrated Computer-Aided Software Engineering (I- CASE) tools. As applicable, applies reverse engineering</p>

and re- engineering disciplines to develop migration strategic and planning documents. May perform a quality assurance role. Identifies all task responsibilities and reports any changes or suggestions accordingly to Program Manager.

Degree in Computer Science, Information Systems or related field and Program Management Professional (PMP) certificate.

	N0008	Principal Consultant II	<p>Specialized Experience: The candidate will have both technical and management experience, from inception to deployment, of two or more large-scale complex Projects in one or more of the following areas: Information Engineering - including demonstrated experience as the senior technical member of a team responsible for the implementation of information engineering projects. Experience in systems analysis, design and programming using CASE and IE tools and methods, (such as Oracle CASE, IEF CASE and I- CASE). Demonstrated experience in the client/server environment.</p> <p>System Architecture and Administration - Must be able to demonstrate use of structured analysis, design methodologies and design tools (such as IDEF 1x, entity relationship diagrams, and other design techniques), object-oriented principles, and experience with the logical and physical functional, operational, and technical architecture of large and complex information systems. Must have demonstrated experience using current DBMS's technologies, application design utilizing various DBMS and experience with DBMS internals.</p> <p>Business Process Reengineering - including facilitation, training, methodology development and evaluation, process reengineering across all phases, identifying best practices, change management, activity and data modeling, or information system development methods and practices; or Communications - including protocol analysis, knowledge of OSI protocol (such as TCP/IP, X.25.X.400 and X.500). Experience with current applicable technology, (such as ATM, frame relay, bridges, routers, gateways, FDDI, network operating systems). MCSE certification, CNE or ECNE experience a plus. Operation and maintenance of communication network systems that may be mainframe, mini, or client/server based. Work with senior staff to define computer security requirements for high level applications, evaluation of approved security product capabilities, and developing solutions to MLS problems.</p> <p>General experience includes demonstrated exceptional written and oral communications skills, including White Papers and formal presentations. Must have demonstrated experience in execution of key project areas. Demonstrated ability to work independently or under only general direction.</p> <p>Responsibilities: Serves as a Technical Project Lead or Manager across all major technical areas of the project, applying a wide spectrum of disciplines for the planning, analysis, design, implementation and support of assigned tasks. Develops analytical and computational techniques and methodology for problem solutions. Performs enterprise wide strategic systems planning, business information planning, business and analysis. Performs process and data modeling in support of the planning and analysis efforts using both manual and automated tools; such as Integrated Computer-Aided Software Engineering (I- CASE) tools. As applicable, applies reverse engineering</p>

and re- engineering disciplines to develop migration strategic and planning documents. May perform a quality assurance role. Identifies all task responsibilities and reports any changes or suggestions accordingly to Program Manager.

Degree in Computer Science, Information Systems or related field and Program Management Professional (PMP) certificate.
